

Binzagr Factory for Insulation Materials Ltd

in Collaboration with

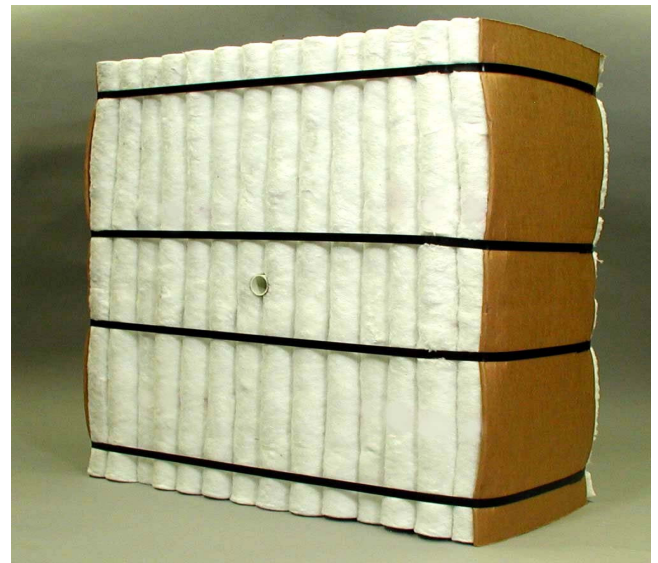

THORPE PRODUCTS COMPANY

Launches World Class Ceramic Fiber Module Systems

Z-Blok™ & SuperFold™

to meet the growing demand of high temperature insulating refractory.

Z-Blok™ and SuperFold™ systems are insulating refractory fiber modules and shapes designed to offer a complete customized lining for petrochemical heaters. The Z-Blok™ and SuperFold™ modules can be designed and fabricated to form special shapes including bullnose module, corbel modules etc. All modules and shapes are engineered and manufactured to provide optimum thermal performance, mechanical integrity, and installation ease for both new construction and retrofit applications. The Z-Blok™ and SuperFold™ have a proven record of performance for versatility of design, reliable attachment, immediate equipment start up, exceptional low heat storage, and high resistance to thermal shock when compared to conventional refractory.
